

ZIRCONIUM OXYCHLORIDE

ZIRCONIUM OXYCHLORIDE: It is an important zirconium chemical raw material, with the appearance of white or yellowish needle-like (or filiform) crystal, used for preparing various zirconium salts and zirconium series products. High quality zirconium oxychloride is produced by the holding subsidiary----Liaoning Huaxiang Advanced Materials Co. Ltd., with advanced energy saving and environmental protection technology, the product has high purity and with excellent performance.

Type	Zr(Hf) O ₂	Fe ₂ O ₃	SiO ₂	Na ₂ O	TiO ₂
Super Grade	≥36.0	≤0.0002	≤0.0005	≤0.0002	≤0.0002
Grade 1	≥35.5	≤0.0002	≤0.0010	≤0.0003	≤0.0005
Grade 2	≥35.5	≤0.0005	≤0.0010	≤0.0005	≤0.0005

Manner of Packing: Using double-layer moisture-proof plastic woven bags, net weight of 25Kg or 20Kg each bag. The product can be packed according to the special requirements of customers.
